EXPERIENCE

Private Bookstore - Software Engineer

- Implemented the entire backend by providing a REST API which is of a monolith type using standard Go libraries.
- Implemented the entire frontend with Next.js (React.js framework).

Product Catalog - Software Engineer

- Implemented the entire backend by providing a REST API which is of a microservices type using standard Go libraries and gRPC as an API for communicating between microservices.
- Implemented the entire frontend with React.js library.

EDUCATION AND CERTIFICATIONS

- ISCG University, Benin Republic
B.Sc. Computer Science, 2023
- Kano State Polytechnic, Nigeria
N.D. Computer Science, 2021
- Responsive Web Design - freeCodeCamp, 2022

PROJECTS

• Private Bookstore

This is a full-stack web application that source it's data from a golang REST API built with Go programming language, REST API, Docker and MongoDB.

• Product Catalog

This is a full-stack web application that source it's data from a golang microservices web API built with Go programming language, REST & gRPC API, Docker and MongoDB.
